

Counter Top Check List

Please create a drawing using a ruler and a pencil or pen. The drawing does not need to be to scale so long as it has dimensions.

- Indicate which material you would like the top to be fashioned from. e.g. Verde Uba Tuba Granite.
- How thick is this top ? 20mm 30mm ?
- Make sure you show the dimensions of all pieces.
- Indicate which edges are finished edges.
- Write down what type of edge detail you require.
- What type of sink cut out do you need ? Is it over mounted or under mounted ?
- An over mounted sink is generally stainless steel although sometimes ceramic and sits on top of the surface.
- Under mounted sinks fit below the surface and therefore the inside edges of the cut out needs to be polished by the stone mason.
- Does the top have a hob cut out. This is generally a rough cut out but if otherwise we must be told about this.
- Mark the number of Tap Holes/mixer taps.
- Do you require upstands or high splash backs ? Please indicate the height of these and do they need any edges to be polished ?

To provide a price, we require the above information but do not need sizes of cut outs etc. Please put a return contact on the drawing and fax or email to us and we will endeavour to reply in 2 days.
